About This Game

The team behind the hit party games Fibbage, Quiplash, and YOU DON'T KNOW JACK presents Drawful 2 the game of terrible drawings and hilariously wrong answers! Use your phone or tablet to draw funny and challenging things like “creepy tiger” or “two moms having a great day.”

Players type in what they think the (probably terrible) drawing really is and then everyone - even an audience of potentially thousands of players – votes on what they think is the correct answer.

Drawful 2 is a go-to party game that everyone can play and enjoy!

Drawful 2 includes new features like the ability to add your own user generated prompts to make even weirder games full of in-jokes with your friends, as well as expanded tools for streaming.

Note: Drawful 2 is in English only.

Note: This game is local multiplayer, but can be enjoyed over streams with remote players.

Title: Drawful 2
Genre: Casual, Indie, Strategy
Developer:
Jackbox Games, Inc.
Publisher:

Very interesting mechanic. Loads of potential.

However...

No key rebinding. Making everything mouse control only.

Awkward touch UI using mouse (see prev point) = Often won't register the initial 'Link' ability click. (Bug?)

Often, spell effects obscure the element of the target node making it almost impossible to know which it is until the effect wears off. A simple hover over element name would help.

Until you've grinded your way through the levels to unlock the element switching spell, you are often totally blindsided by stages where there is no way you can win, due to random element starts. If not initially, a SINGLE mistaken capture by the wrong element will cause it.

While you can pause the game, there is no way to scroll the map while paused. The fact that the game FORCES a standard zoom level makes this frustrating. Why even have a zoom feature if you forcefully auto reset it?

It is obvious this is an abandoned, port, from mobile devices so I find no reason to expect any of the above issues to get resolved so, I am unable to recommend this title.

That is, unless you think it is worth the risk during its regularly deep discounts.

. The game is great, you wanna use a controller or change the inputs(if you use a keyboard) or else you cant play the game, it's alot of buttun smashing and fun. 1000000000/10 -totallynotIGN. Perfect example of an easy to learn, hard to master game. Great game in almost every way.. This is not \$1.99 levels of gameplay. This is barely even a free app on mobile phone level of gameplay. DO NOT BUY the developer obviously bought good reviews for this awful game. I played it for about 10 minutes and got all that I possibly could out of it. (I left it idling for an extra 3.2 hrs).. I recommend it, but the game is frustrating as hell. There is a terrible dead level between level 3 and 4, the classes seem to weak to deal with the content solo.

This game just does not offer enough solo play, after level 3, soloing becomes impossible hard for all classes except rogue, group play just adds more mobs to the same quest....

Game has no way to activate random encounters to help level up your character.

Loot system is total crap, re running dungeons you get nothing.

A massive waste of reusable content of absolutely no point at all.

I am now at a point where I can no longer continue due to the 3 Vs 1 combat fights.

If you invite a friend, you just get twice the number of mobs spawning, it is totally lame coding.

Characters are forced down a very narrow quest path, there is no deviation.

You do the quests in sequence.

Solo exp seems limited

Enjoyable for a few hours but I miss being able to random encounter and many of the classes are totally gimp.

It wasnt until I fluked a run with a rogue by constantly re stealthing then using the recover option to slowly heal to full, did i actually make it to level 4.

At level 4 the gear is much more balanced.

Just getting to level 4...omg frustrating so many re runs on solo.

They need to allow more money for gear, or better starter gear loot, the toons just feel weak when soloing 2 vs 1, 3 vs 1 is just instant death.. Nice game, maybe later buy previous parts. Fantastic platformer. Every time you progress deeper into the depths

of the cave there will be new elements and puzzles you'll need to solve to progress further. Only qualm I have is that I wish there were more levels! Definitely earned a fan for life. 10/10. Best trade simulation i ever play, but have some problem in latest windows. and save file cannot sync with steam cloud. but still i love this game!. This game is broken.

Constant slowdowns to 10 FPS, for no apparent reason.

Controls are bad. Sending a follower in a straight line when I'm clearly aiming at an enemy that is straight from me should make the follower have some kind of pathfinding at the very least, but NO! it doesn't exist! Also, if you're too close to the target the followers simply don't care and retreat all the time.

Audio is kind of messed up too, it constantly skips VFX sounds or voice lines.

I know it doesn't look like a lot, and I'm a person that finds people's complaints about broken games ridiculous, as I usually can fix those problems by simply going to the ini file or changing settings, but this is not one of those games.

I can't recommend this game. Unplayable.

The game leaves you wishing there was more of it.

The game got a comedy theme so the story shouldn't be taken very seriously. A classic point and click feeling with good puzzles and artwork, this game shouldn't be missed by any adventure games fan.. Well, IMO you REALLY need someone to play this with, Mic encouraged, and a good ammount of immaturity helps!

whens the other decks getting ported over?. I loved 7 Wonders previously and I must say that this new opus is quite good and more challenging than the others. And the little guys are still that funny.

In other words, you still have to build magnificent sites, apart that here, you're kinda helped by aliens. Your goal is to destruct tiles by making a chain of 3 or more of the same shapes (the colors are helping you to distinguish them) and then to make a big cube fall down. Some tiles are special: the green ones help you to gather trees, flowers or grass, the light blues one to collect water, etc etc... They're important if you want to build the wonder under a specific number of levels and to gain more.

Each chain of more than 3 is bringing you bonuses, like eliminating a line, etc.. It can help to reach tiles that can be a pain in the♥♥♥♥♥to destroy for example.

Also, you can bonus like a bomb or a swap tiles, etc... that can be used during the level, though you have to resplenish these powers by making chains.

In that opus, you can also build your own little village thanks to unlocked buildings.

7 Wonders: Ancient Alien Makeover is a nice match-3 game. Don't hesitate..

<https://www.youtube.com/watch?v=h3uBr0CCm58>. Very well developed game. Has many enemies and lots of really good graphics. If I had to give this game a rating it would be 10/10!. Now I do not have to look at that annoying face ever again!
